Professional Summary

Software Engineer with 6+ years of experience developing scalable enterprise web applications using React.js, JavaScript, Redux, and Node.js. Skilled in frontend architecture, REST API integration, performance optimisation, debugging, testing, and CI/CD workflows across Agile and SDLC environments. Experienced in building customer service platforms, analytics dashboards, and enterprise workflow applications. Familiar with TypeScript, Next.js and legacy application modernisation projects.

Core Competencies

React.js Development • Frontend Application Development • REST API Integration • Performance Optimisation • Redux • Responsive UI Development • CI/CD • Debugging & Production Support • Agile Methodologies

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS/SASS, LESS, Responsive UI Development
Frontend Technologies: React.js, Redux, React Hooks, React Context API, Material UI, Ant Design, Bootstrap
Backend Technologies: Node.js, Express.js, REST APIs, Microservices
Testing Frameworks: Jest, React Testing Library
Tools & Platforms: Git, GitHub, Jenkins, Rancher, Webpack, npm, yarn, JIRA, Confluence, Agile, SDLC
Databases: SQL, MySQL, NoSQL

Work Experience

Altimetrik India Pvt Ltd
Engineer – Product and Platform Engineering | Oct 2021 – Jan 2026
Client: Samsung Electronics

- Designed and developed scalable React.js applications using Hooks, Functional Components, Redux, reusable UI components, and component-based architecture.
- Worked on enterprise customer service platforms and order management system functionalities for large-scale business workflows.
- Implemented role-based access systems and workflow enhancements improving operational efficiency.
- Integrated RESTful APIs and managed asynchronous data handling for enterprise-level applications.
- Optimised application performance through bundle optimisation, code splitting, lazy loading, and reducing unnecessary React re-renders.
- Collaborated with backend, QA, and product teams to deliver production-ready features.
- Participated in debugging, testing, code reviews, CI/CD activities, and deployment support in Agile environments.
- Enhanced the SKU Swap functionality in the Fulfilment application by migrating the existing Elasticsearch-based upload mechanism to AWS S3 integration. Developed the PLT file upload module for the Customer Service application with file management, data visualisation, filtering, sorting, and tabular data handling features.

Client: PayPal

- Developed analytics dashboards and reporting tools using React.js and Redux for enterprise monitoring workflows.
- Built interactive UI features including charts, filters, and heat maps to enhance data visualisation.
- Integrated and consumed REST APIs, improving application responsiveness and data flow handling.
- Enhanced accessibility standards and upgraded legacy React components for better maintainability.
- Resolved critical production issues and collaborated with cross-functional teams to improve application stability.

SkiTech

Junior Developer | Sep 2019 – Sep 2021

- Developed healthcare web applications with accessibility-focused and responsive UI implementations.
- Developed shared UI components and frontend frameworks to accelerate feature delivery.
- Designed admin dashboards and integrated APIs for business workflows.
- Worked on bug fixing, debugging, and feature enhancements in Agile development cycles.

Education

Bachelor of Science in Computer Science – 2019

Certifications

MERN Stack Front To Back: Full Stack React, Redux & Node.js

Provider: Packt | Credential ID: D4AI1JPKOBZ2
